

Charging Patients for PPE

Many members have questions about charging for the added costs of PPE. Here's what you need to know:

- If your office is fee-for-service and does not take insurance, you can charge all your patients a fee for PPE if you wish.
- You may also charge for PPE for any patient who has no insurance and is fee-for-service.
- You may charge for PPE for patients who have insurance through a plan with which you do not contract.
- If you are a Delta, Healthy Kids, or Medicaid provider, you cannot charge Delta, Healthy Kids, or Medicaid patients a fee for PPE.
- For all other patients with insurance, check with the dental plan provider to determine if a PPE fee is allowed.
