

Michigan Dental Association  
2023 Allocation of Delegates

**Formula:** After allocating one delegate to each component having a membership of up to one percent (1%) of the total Association membership, each remaining component shall be allocated one delegate for each full one percent (1%) of the total Association membership, with any fraction of a percent to be determined by 'The Method of Least Proportionate Error', based on the percentage of total Association membership each component society has on August 15 of the preceding year.

In applying this formula, the calculations were as follows: On August 15, 2022, the Association had 5,732 active, life, retired and waiver members. As indicated in the *Bylaws*, each component society is entitled to one delegate for having up to one percent (1%) of the total membership. In this case, 57.32 members. **(See Below)**. Taking the number of members in each district over 57.32 and allocating one delegate for each 57.32 (or major portion thereof), results in the following allocations:
